

CI/CD servers

Continuous Integration

- Version Control (ex: Jenkins)
- Automated Building
- Automated Testing

Continuous Deployment

Visibility – All aspects of the delivery system including building, deploying, testing, and releasing are visible to every member of the team to promote collaboration.

Feedback – Team members learn of problems as soon as possible when they occur so that they are able to fix them as quickly as possible.

Continually deploy – Through a fully automated process, you can deploy and release any version of the software to any environment.

Pipelining
